

## ITS - FONDAZIONE ROBERTO ROSSELLINI

### “ISTITUTO TECNICO SUPERIORE” - An alternative to University

#### What is the “Istituto Tecnico Superiore”? (ITS)

ITS is a sort of “**Technical College**”, a post high school biennial course close in spirit and purpose to the German “Berufsschulen – Lehre/Ausbildung” courses.

They are advanced technical courses designed and managed by a foundation created by several partners: a University, a Technical High School, representatives of technological private companies and, in the case of the Roberto Rossellini Foundation, a highly specialised Audiovisual Training School (MAGICA).

ITS was introduced in 2008 in the national education system by the Italian Ministry of Education, University and Research **with the aim of setting up a post-secondary education program parallel to university courses**. ITS diplomas are legally recognised in Italy and valid throughout Europe.

They meet the needs of companies in terms of **new and high technical and technological skills**, being the link between education and the job market.

#### Why choose a ITS course?

- It is a **valid alternative to a Bachelor degree course**.
- It is a **non-university educational course**, parallel to degree courses, but **shorter** (2 years).
- **50% of the hours** is spent in editing and shooting **laboratories**.
- A **6-month internship is guaranteed** in companies in this sector.
- It is not simply a training course but a 2-year course **recognized and financed by the Ministry of Education and by the Lazio Region**.
- At the end you obtain a State-recognised **DIPLOMA of Higher Technician**, which allows you to participate to public competitions.
- It prepares you for a **direct access to the job market** within your specialization field.
- **It trains professionals able to meet the needs of private and public work sector**, related to the strategic areas for the economic development of the country.

#### Who can enrol at ITS?

People with a High School qualification, who want to obtain a Diploma of Higher Technician, to quickly fit into the job market.

#### Educational Areas

**ITS trains higher technicians in the strategic technological areas of the different Regions** (Mobility, Made in Italy, Cultural Heritage and Activities, Tourism, Logistics, etc.).

The ITS Roberto Rossellini **is the only one in central Italy that offers courses in the field of Information and Communication Technologies** (Audiovisual).

## Istituto Tecnico Superiore (ITS)

**For those who dream of working in the movie, tv and new media industry**

#### The ITS Foundation “Roberto Rossellini”

It was founded in 2010 (according to DPCM/DMCP of 01/25/2008 and approved with RCD (Regional Council Deliberation) 12/23/2009). Partners are University of Roma 3, I.I.S.S. Cine-tv Rossellini, Educational/Formative Entity/Organization/Institution MAGICA, Città Metropolitana di Roma Capitale, Orange Media – Entertainment and Digital Factory, Skuola.net.

## Professional profile

The Foundation offers each year a **2-year course of Higher Post-Diploma Education in the AudioVisual sector**, recognized by the Ministry of Education (MD February 7, 2013) and it is valid throughout Europe.

Graduates from ITS Rossellini can operate **in the movie and tv production and post-production sector**, working closely with the director and the related departments (shooting, scenic design, editing, special effects, etc.).

He/she can use state-of-the-art digital shooting instruments and can integrate them in the workflow of post-production.

He/she can also work in **live set-up projects** that need filming, and in the **information, communication and advertisement sectors**, within **traditional media** or **new-generation platforms**. He/She develops skills as a Videomaker.

Thanks to the research activity of the Foundation, **the course's contents are enriched each year** according to the trend in the audiovisual sector and according to the newer skills required by the job market (special effects, new media, shooting in a virtual set, web journalism, scene design, etc.).

## Methodology

**50% of the 1800 hours is dedicated to laboratories** with training in shooting, editing and post-production, with project works created in virtual sets and soundstages and with the use of advanced technologies (Drones, Visual Effects, Stop Motion). **The Internship is guaranteed in a company** (at least 540 hours).
